DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2-5, 11, 13 and 15-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Blonder et al. (5,048,908).

Regarding claims 16 and 19, Blonder et al., figure 3 shows an optical fiber with reduced effects of linear birefringence, comprising a length of the optical fiber, wherein the fiber comprising a twist separating the fiber into a plurality of sections, and wherein the twist is formed by heating the fiber (column 3, lines 56-65), wherein the twist angle between respective ends of the adjacent sections is substantially equal to 90° (column 4, lines 5-10).

Regarding claim 17, the optical fiber is a circular-cored single-mode fiber.

Regarding claim 18, an orientation of the fiber is maintained along the plurality of sections separated by the twist.

Regarding claims 2-5, 11, 13 and 15, the features in the method claims are identical to those in the apparatus claims. Therefore, the method of reducing the effect of linear birefringence in an optical fiber alone is not a patentable feature.

Response to Arguments

3. Applicant's arguments with respect to claims 2, 11 and 16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion
